EDITORIAL.

Here's hoping that the latest cam-
paign of the Y. M. C. A. may be suc-
cessful and that this may be the last
campaign necessary.

School principals are requesting
that persons should not visit or tele-
phone them during recess or noon
intermissions. Instead of that being
a time of leisure for them it is their
busiest time. They prefer to be
called during the regular school
hours.

Grand Master Crews in a recent
speech in St. Joseph is said to have
strongly criticised the people of that
city for their tendency toward bit-
ter factional strife. Kansas City is
developing a guild of gossip and
scandal mongers which will soon rival
our little sister up the river in crea-
tion of foment and discord. Are you
a member of the guild?

If all the energy spent by our peo-
ple in dissipation such as may be
witnessed in any of the congested
districts, could be directed in struggling
upward and lifting each other, what
a vast difference it would make in
our wellbeing. The tough saloon, the
transient rooming house, with its
hypocritical process and the buffet
flat are the real sources of the influ-
ences which are weakening and de-
grading us.

THEY SAY

—That the Y. M. C. A. will soon
lose a valued officer.

—That you'd better buy some coal
if you haven't bought any.

—That dear old Kansas City is the
best town for colored people west of
the Mississippi. She is that.

—That following the Crews-Bass
wedding is to be another that will
create a sensation. Guess who?

—That the Charity Ball by the Clip-
pers at Lyric Hall on next Monday
night will be the event of the season.

—That a certain Negro wrote
friends in a certain Western city that
he was "de leadin' old cullud society"
in Kansas City, but upon investigation
the sun finds that he is nothing but
a house boy and a floor scrubber.

—That every time you go to light
the gas these cold mornings you in-
variably use a word describing the
country where no one cares to go,
but which is spelled with four little
letters. Give us some gas.

—That a certain fond mother was
proudly boasting that at a recent
school examination her son proved the
best scholar in his class, but upon
investigation it was learned that
there were but two in the class, and
the other boy had been home sick
for a week.

—That when a certain well known
man who has been having consid-
erable hard luck learned from the edi-
tor that there were fifty widows and
valuable property in Los Angeles
looking for husbands he immediately
commenced visiting the pawn shops,
and when one of his friends asked him
what was the matter and what he
was doing, the only reply he would
make was: "California bound."

Prof. D. Archer Gregg will be our
speaker at the vesper service at 3
o'clock Sunday, October 18. He is to

Emergency Hint.

Persons falling out of aeroplanes
will find it quite useless to depend
upon any of the ordinary safety de-
vices, antidotes, block systems, fire
extinguishers, life preservers or other
similar contrivances, for though all
of them are perfectly good in their
proper time and place, they do not
meet this particular emergency. The
only thing to do when convinced you
are falling is to make a thorough ex-
amination of the underlying land-
scape. For this purpose it is often
well to have handy a geological chart,
or relief map. When you have thor-
oughly familiarized yourself with the
topography of the approaching land-
scape, it is then perfectly simple, by
two or three little bodily maneuvers,
to pick out a relatively soft spot. If
you have acted wisely in the matter,
there is nothing more to do but lie
there and wait for help.—Life.

Eat Before Working.

However practicable it may be for
the stalwart farmer to rear himself
out of bed in the cold, gray dawn—or
even before—he do half a day's
work before he comes back to the
farmhouse for breakfast, experiment
shows to show pretty conclusively that
it is almost useless to attempt to do
any work that calls for the exercise of
the reasoning processes of the mind
before the morning sacrifice to the
stomach. Particularly is this the case
with children and yet how often do
we see the little ones grudge to get up
and study in the morning before break-
fast, or at least permitted to lay aside
some of the home work in the eve-
ning on the plea that they can "do it
in the morning." Some may be able
to do it; but it is safe to say that 90
per cent cannot, nor is it right to ask
them to try.

IMPROVING SUBMARINES.

The day is approaching when sea-
going submarines of high surface
speed will accompany the main fleet
on the high seas. Large vessels of
this type, of 21 knots speed, have
been designed for the United States
navy. Great Britain is building, in
the Nautilus, the largest submarine in
existence, which is intended to be as
seaworthy while on the surface as the
latest type of destroyer. Its surface
speed will be not less than 21 knots,
and it will have a submerged speed
of from 15 to 16 knots; it will carry
six torpedo tubes, and the surface dis-
placement will be about one thousand
five hundred tons.
